## NINR Joins HEAL Executive Committee

- HEAL Initiative established to develop long-term solutions to the national opioid crisis
- Has already supported 100's of projects across the U.S.
- NINR recently joined the HEAL Executive Committee

### The Helping to End Addiction Long-term<sup>SM</sup> Initiative

Supporting science-based solutions to the opioid crisis

#### What is the NIH HEAL Initiative?

The Helping to End Addiction Long-term<sup>SM</sup> Initiative, or NIH HEAL Initiative<sup>SM</sup>, is an aggressive, trans-agency effort to speed scientific solutions to stem the national opioid public health crisis. Almost every NIH Institute and Center is accelerating research to address this public health emergency from all angles.

The initiative is funding hundreds of projects nationwide. Researchers are taking a variety of approaches to tackle the opioid epidemic through:

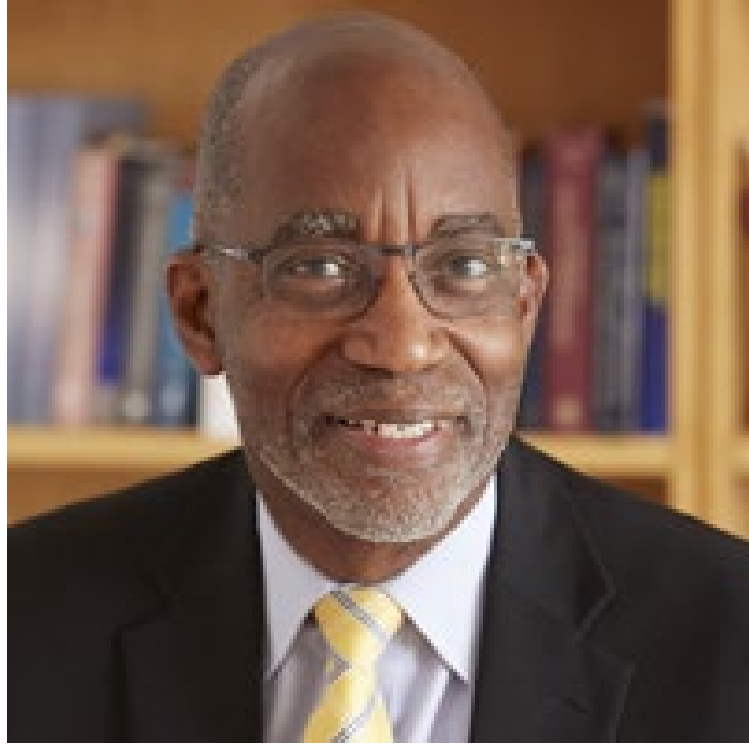

- Understanding, managing, and treating pain
- Improving treatment for opioid misuse and addiction

## Key Principles

- Think **boldly**; think **differently**
- Think about the end at the beginning: plan for **translation**
- Demonstrate **impact**
- Embrace **change** and **opportunity**
- **Mentor** the next generation
- We want to hear from you!

## Taking Nursing Science to New Levels

- Push discoveries in multilevel integration, from the molecular to the macro
- Prioritize social determinants of health
- Identify practice and policy solutions and their effective translation

## Taking Nursing Science to New Levels

### ■ Sample questions for consideration:

- Where can we have the biggest impact?
- What are key scientific areas in multilevel integration?
- How can we eliminate health inequities?
- What are effective approaches in nursing practice and policy translation?
- What training will prepare scientists to propel upstream-downstream integration and impact?

## Possible Future Topics for Council Input

### Current

- Strategic Plan Working Group – Advising on future research directions
- Pathways Working Group – Enhancing nursing research education and training

### Potential Future Topics

- Inclusion of underrepresented groups in NINR-supported research
- Training and career development models to ensure investigators stay on the cutting edge of science
- Strategies to ensure NINR-supported clinical trials are adequately powered
- Strategic distribution of limited resources
